

An International Franchise Consultancy Opportunity

Who are we?

Since 1981 Franchise Development Services (FDS) has been recognised as world leader in providing a total range of services to the Franchise market. Established in the United Kingdom (4 offices), Spain (3 offices), Italy, the Middle East (5 offices) and South East Asia (3 offices), we publish *Franchise International* and various national Franchise magazines and directories. The FDS method of Franchising conforms to ISO 9002 and has proved to be both practical and profitable for more than 500 clients. Many rely entirely on our corporate services to complete their national and international expansion.

What can we offer an FDS Master Franchisee?

A genuine business opportunity to use our reputation, the successful FDS system and total business opportunity in its own right. You will be part of an international network, providing professional advice and guidance to assist companies in your country in expanding by following the Franchise route. In addition you will represent the many new and famous franchise brands desiring to enter your territory, and will be assisted at all times through the professional help and guidance of FDS head office.

What are we looking for in a Franchise Partner?

Those very special partners who can be trusted to work diligently and develop our reputation in new markets. Master Franchisees need to have enthusiasm and the imagination to see more than just an investment. We need confident people who are able to provide the right kind of professional marketing and business management consultancy, together with an understanding of legal and financial matters that will ensure our continued global expansion.
